

**Dominic Oughton**  
Senior Industrial Fellow  
University of Cambridge Institute for Manufacturing

Dominic Oughton spent 20 years in leadership roles in manufacturing industry, prior to joining the University of Cambridge Institute for Manufacturing (IfM) in 2005. Dominic started his career with PA Consulting Group, developing manufacturing strategy and automation solutions in industries as diverse as Pharmaceuticals, Food, Electronics and Metals. He then led the development of a new product range for the industrial machinery division of Massey Ferguson, before forming a UK start-up for an off-shore manufacturing group.

Over the last 10 years Dominic has held three MD roles, leading profitable growth in businesses in the electronics industry. Dominic managed the UK Metering and Environmental Systems Divisions of the global Siemens Group, and most recently led Baxall Limited, market leading CCTV manufacturer.

Dominic is an alumnus of IfM's Manufacturing Engineering Tripos, with a first class honours degree and MEng in Manufacturing Engineering.

Dominic's current role is leading projects with partner companies aimed at putting IfM research output into practice. His main focus of activity is in developing and implementing competitive manufacturing strategies and in accelerating new product and process Innovation.
