

Hannah Kozich
Head of Improvements, Magnox
Sellafield Ltd

Hannah is an experienced engineer and improvement professional, who has worked across a wide range of projects and industries; with in depth knowledge and a successful track record in delivering improvement programmes, working with staff and transferring skills to ensure self sufficiency and to embed the change in culture. A chartered Mechanical Engineer, she also holds a Diploma in Management Studies, a Certificate in Training Practice, and is an Associate Member of the Chartered Institute of Personnel and Development.

As the Head of Improvements works across the Magnox Operating Unit at the Sellafield site her role is to drive strategically the improvement agenda within the OU, whilst working with the wider improvement community to develop best practice and standard approaches.

Hannah is a member of the Magnox Executive and in this role supports the senior team to develop an effective improvement strategy and plan to meet both customer and wider site needs. Underpinning this strategic function is the development of systems and processes to support the creation and growth of a continuous improvement culture.

Prior to joining Sellafield Hannah worked as a lean consultant and held various positions at Pirelli Ltd including Quality Maintenance Co-ordinator and Training and Development Manager.
